

encyclopedia of cryptozoology a pdf

Thunderbird is a term used in cryptozoology to describe large, bird-like creatures, generally identified with the Thunderbird of Native American tradition. While the fossil record does show that giant birds with wingspans between 4 and 5 m (13 and 16 ft) were likely contemporary with early man, the creature is generally regarded as a myth.. This article deals with modern sightings (the last ...

Thunderbird (cryptozoology) - Wikipedia

Cryptozoology is a pseudoscience and subculture that aims to prove the existence of entities from the folklore record, such as Bigfoot, the chupacabra, or Mokele-mbembe. Cryptozoologists refer to these entities as cryptids, a term coined by the subculture. Because it does not follow the scientific method, cryptozoology is considered a pseudoscience by the academic world: it is neither a branch ...
