An essential oil is a concentrated hydrophobic liquid containing volatile (easily evaporated at normal temperatures) aroma compounds from plants. Essential oils are also known as volatile oils, ethereal oils, aetherolea, or simply as the oil of the plant from which they were extracted, such as oil of clove. An essential oil is "essential" in the sense that it contains the "essence of" the plant ...

Essential fatty acids, or EFAs, are fatty acids that humans and other animals must ingest because the body requires them for good health but cannot synthesize them.. The term "essential fatty acid" refers to fatty acids required for biological processes but does not include the fats that only act as fuel.
