Statistical inference is the process of using data analysis to deduce properties of an underlying probability distribution. Inferential statistical analysis infers properties of a population, for example by testing hypotheses and deriving estimates. It is assumed that the observed data set is sampled from a larger population.. Inferential statistics can be contrasted with descriptive statistics.

Inductive reasoning is a method of reasoning in which the premises are viewed as supplying some evidence for the truth of the conclusion (in contrast to deductive reasoning). While the conclusion of a deductive argument is certain, the truth of the conclusion of an inductive argument may be probable, based upon the evidence given.. Many dictionaries define inductive reasoning as the derivation ...

- [Voiceover] Hi. I'm Joseph Schmuller. Welcome to Statistics with Excel Part One. In this course, we look at the building block concepts of statistics and use Excel as a tool to explore them. For example, one important fundamental concept is called the sampling distribution. Understanding sampling distributions will take you a long way toward understanding statistics.
