The Ten Essentials are survival items that hiking and Scouting organizations recommend for safe travel in the backcountry.. The Ten Essentials first appeared in print in the third edition of Mountaineering: The Freedom of the Hills (January 1974). Many regional organizations and authors recommend that hikers, backpackers, and climbers rigorously ensure they have the ten essentials with them.

In physiology, body water is the water content of an animal body that is contained in the tissues, the blood, the bones and elsewhere. The percentages of body water contained in various fluid compartments add up to total body water (TBW). This water makes up a significant fraction of the human body, both by weight and by volume. Ensuring the right amount of body water is part of fluid balance ...
