evolution or extinction the pdf

This is the second day of a two part lesson covering evolution and extinction, which are similar concepts in how they affect the fossil record. Students watch a (great!) video clip and examine the impacts of mass extinctions on the fossil record, and explore the idea of exactly how extinctions can impact organisms on a global scale.

Mass extinctions and macroevolution

We have long thought of evolution as an extremely slow process, and have too often only regarded it on a macro-evolutionary scale: the origination of a new species and the loss of species through extinction. Nevertheless, the rate of species loss greatly exceeds that of the origination of new species.
