In the fields of science and engineering, the accuracy of a measurement system is the degree of closeness of measurements of a quantity to that quantity's true value. The precision of a measurement system, related to reproducibility and repeatability, is the degree to which repeated measurements under unchanged conditions show the same results. Although the two words precision and accuracy can ...

How precise are your measurements? An important question, because the lower the precision, the more subjects you'll need in your study to make up for the "noise" in your measurements.

Although RNAi is a powerful technique, microRNA (miRNA) "seed"-based off-target effects have been reported to confound experimental interpretation (Birmingham et al., 2006, Buehler et al., 2012b, Jackson et al., 2006). We hypothesized that explicitly modeling on- and off-target effects induced by RNAi in a large set of cancer cell lines would provide the means to estimate the on-target ...
