Missing data is endemic in much educational research. However, practices such as step-wise regression common in the educational research literature have been shown to be dangerous when significant data are missing, and multiple imputation (MI) is generally recommended by statisticians. In this paper, we provide a review of these advances and their implications for educational research.

Friedrich August von Hayek was born in Vienna to August von Hayek and Felicitas Hayek (née von Juraschek). His father, from whom he received his middle name, was born in 1871 also in Vienna. He was a medical doctor employed by the municipal ministry of health with a passion for botany, about which he wrote a number of monographs. August von Hayek was also a part-time botany lecturer at the ...

1 Introduction. From the early 1990s, major labour law reforms were implemented in Southern Africa. These reforms were driven by the adoption of new national constitutions (some entrenching the right to strike), a desire to democratise the workplace, and trade liberalisation. [1] The countries analysed in this article have all formally endorsed the instruments of the International Labour ...

The Birth of Probability and Statistics The original idea of "statistics" was the collection of information about and for the "state". The word statistics derives directly, not from any classical Greek or Latin roots, but from the Italian word for state.. The birth of statistics occurred in mid-17 th century. A commoner, named John Graunt, who was a native of London, began reviewing a weekly ...

A chart form of Reams wisdom. I require a term to express those bodies which can pass to the electrodes, or, as they are usually called, the poles. Substances are frequently spoken of as being electro-negative, or electro-positive, according as they go under the supposed influence of a direct attraction to the positive or negative pole. But these terms are much too significant for the use to ...
