maths strategies in their classrooms.

### **Mental Maths Strategies for Multiplication and Division**

Generic programming is a style of computer programming in which algorithms are written in terms of types  
to-be-specified-later that are then instantiated when needed for specific types provided as parameters. This  
approach, pioneered by ML in 1973, permits writing common functions or types that differ only in the set of

types on which they operate when used, thus reducing duplication.

**Generic programming - Wikipedia**
