Fundamental factors affecting liquefaction susceptibility

5 Susceptibility Factors. Several factors are known to influence susceptibility to the adverse effects of arsenic. This chapter addresses susceptibility factors discussed in the committee's workshop by Beck (2013) and Hansen (2013) life stage, genetics, nutrition, and pre-existing disease and the additional factors of sex, smoking, alcohol consumption, and exposure to mixtures.

this disease is established on the corals or what factors contribute to their susceptibility. The disease is more prevalent during the warm summer months (Antonius 1981, 1985, Rätzler et al. 1983, Taylor 1983, Edmunds 1991, Kuta & Richardson 1996, Bruckner et al. 1997) and in locations where poor environmental conditions persist.

can be undertaken, etiological factors of root fractures need to be fully understood, and factors affecting fracture susceptibility need to be more clearly identified. A better understanding of VRF might then enable the practitioner to create biologically and mechanically sound preventive strategies and/or management.
