In these kinds of systems fish production per unit of surface can be increased at will, as long as sufficient oxygen, fresh water and food are provided. Because of the requirement of sufficient fresh water, a massive water purification system must be integrated in the fish farm. One way to achieve this is to combine hydroponic horticulture and water treatment, see below.

Electricity is the set of physical phenomena associated with the presence and motion of matter that has a property of electric charge. In early days, electricity was considered as being not related to magnetism. Later on, many experimental results and the development of Maxwell's equations indicated that both electricity and magnetism are from a single phenomenon: electromagnetism.

In the previous topic, Electrical Design Philosophy for Major Types of Buildings, We talk about the different types of buildings and how the building type (function) influence its electrical design. This was very clear in our previous discussions for the electrical design requirements of the industrial buildings which were included in the following topics:
