I did it! This weekend I brought out my wings again for a second test. And here it is. Do I need to say more? Just watch the video

### **Flying like a bird | Human Birdwings**

A number of animals have evolved aerial locomotion, either by powered flight or by gliding. Flying and gliding animals (volant animals) have evolved separately many times, without any single ancestor. Flight has evolved at least four times, in the insects, pterosaurs, birds, and bats. Gliding has evolved on many more occasions. Usually the development is to aid canopy animals in getting from ...
