The environmental impact of the energy industry is diverse. Energy has been harnessed by human beings for millennia. Initially it was with the use of fire for light, heat, cooking and for safety, and its use can be traced back at least 1.9 million years. In recent years there has been a trend towards the increased commercialization of various renewable energy sources.

Mitochondria are often referred to as the powerhouse for their role in generating the energy supply for cells. However they have lacked the spotlight for their important role in a variety of other biological functions. Researchers at the United Mitochondrial Disease Foundation have learned that only 3% of the genetic material contained in a single mitochondrion is designed to produce cellular ...
